Dear Student,

Welcome to the Towson University community. You have made a wise decision to continue your education. You also have chosen an outstanding university at which to do so.

Graduate education is a high strategic priority at Towson University. We have embarked on an ambitious plan to add new graduate programs, strengthen existing programs, and expand the presence of graduate study on campus. By 2005, we expect graduate students to represent 20 percent of the student body.

Our graduate programs focus on applied knowledge and research. As a metropolitan university, Towson plays an important role in shaping and enhancing regional economic growth. One important way the University fulfills this role is through graduate education: providing advanced professional skills to citizens, while offering new knowledge and applications to private, public and nonprofit organizations.

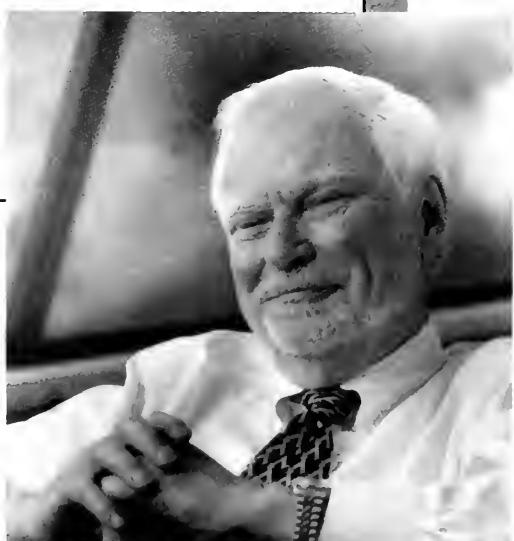

As you are well aware, new knowledge is being created all about us at a rapid pace, and continuous, lifelong learning has become a necessity for those who want to stay current, credentialed, and creative. Whatever your field of study, I know that you will find at Towson a dedicated faculty, excellent information resources, state-of-the-art technology, and valuable connections to others in your profession – in short, the essential elements of a positive learning environment.

This catalog will serve as your guide during your graduate career at Towson University. In it you will find details about programs, courses, policies, and campus services. I wish you the best during your studies at Towson, and in all your future endeavors.

GENERAL INFORMATION

The University

History

Towson University had its beginnings in 1865 when the General Assembly of Maryland established a statewide public school system. The first state teacher training institution was the Maryland State Normal School, which in 1935 became the State Teachers College at Towson. Formally opened in Baltimore on January 15, 1866, the Normal School was for many years the only institution devoted exclusively to the preparation of teachers for the public schools of Maryland. The school occupied three different locations in the city of Baltimore before moving to its present suburban location in 1915. By 1935 the Bachelor of Science degree in education was offered and the school's name was changed to the Maryland State Teachers College at Towson.

In 1946 the arts and sciences program was introduced at Towson. Beginning as a two-year transfer program, it was extended to a four-year degree-granting program in 1960.

In 1963 the college was authorized by action of the legislature to expand its offerings in the arts and sciences while maintaining a strong program in teacher education, and to change its name from State Teachers College at Towson to Towson State College. Graduate education began in 1958, and in 1976 the legislature granted University status and renamed the institution Towson State University. On July 1, 1997, an act of the legislature changed the name once more, to Towson University.

The Campus

The University is situated on a campus of over 320 acres located one and a half miles beyond the northern border of the city of Baltimore. Within an eight-mile radius of the campus are all the cultural advantages of the city of Baltimore - The Peabody Conservatory of Music and Library, the Enoch Pratt Free Library, the Walters Art Gallery, the Baltimore Museum of Art, Meyerhoff Symphony Hall, the Lyric Theatre, Center Stage and many other cultural centers necessary for a well-rounded university experience.

Campus buildings and facilities give excellent support to the various University programs. The inside back cover of this catalog provides a pictorial guide of the campus, and Appendix A describes the campus facilities.

The Graduate School

Graduate study prepares qualified students for career advancement, leadership positions and further graduate study. The University serves the community, state, and region by making graduate degree programs available to full-time students and part-time students who can attend classes only in the evening. Numerous students also take advantage of graduate offerings without enrolling in degree programs.

The graduate faculty, which includes many widely recognized scholars and practitioners, is committed to excellence in teaching in a scholarly environment. The faculty, classroom, library, clinical, laboratory and studio assets of the graduate programs are supplemented by a community rich in cultural, artistic, social, technological and scientific resources.

There are now twenty-seven graduate degree programs and two certificate programs. The University is proud of the many alumni of our graduate programs who fulfill with distinction the requirements of responsible careers.

A Diversified Student Body

The faculty and administration of the College of Graduate and Extended Education at Towson University recognize and value the richness that is present in a diversified student body. Towson University students are racially and nationally diversified.

Graduate Studies Committee

The Graduate Studies Committee, a committee of the University Senate, determines policy for graduate programs. Matters of graduate curriculum and standards are the responsibility of the committee. The Graduate Studies Committee also hears appeals related to academic matters by graduate students. Student appeals to the committee should be directed to the Dean, College of Graduate and Extended Education.

The voting membership is comprised of six members of the faculty and two graduate

students. The Dean of the College of Graduate and Extended Education, two graduate co-ordinators and the Director of the Library are ex-officio members. The chairperson and secretary of the committee are elected from its membership.

Administration Of Graduate School

The Dean of the College of Graduate and Extended Education, Associate Dean, Director of Graduate Education and the Associate Director for Graduate Admissions and Outreach are the administrators responsible for the Graduate School. They administer graduate study and implement the policies of the Graduate Studies Committee.

Graduate School Office Hours

The Graduate School Office is open Monday through Thursday from 8:30 a.m. to 7:00 p.m. and Friday from 8:30 a.m. to 5:00 p.m. (except for scheduled holidays). During registration, the office is open in the evening according to the registration schedule. Students may arrange for appointments with the Graduate staff at other hours. The Graduate School telephone number is 410-830-2501.

ACADEMIC INFORMATION

Application and Admissions

Application to Graduate School

Admission to Graduate School at Towson University is granted to applicants whose academic and personal qualifications give promise of success in graduate study. The applicant must hold a baccalaureate degree from a regionally accredited college or university, or from a Maryland college or university that is approved by the Maryland Higher Education Commission.

The application process is self-managed. The applicant has the responsibility for acquiring all application credentials and submitting them in an envelope to the Graduate School Office. Credentials should not be sent separately. The application packet with complete instructions may be obtained from the Graduate Office.

Registration as a non-degree graduate student in courses at the 500 and 600 level is possible, in some programs, during the admission review period. Non-degree students and students wishing to register before the admission decision must submit the application form and the application fee to the Graduate office before registration. Up to twelve hours of courses taken as a non-degree student may be included in the degree if approved later by the program director.

International Students

Application for admission should be made at least six months prior to the date of anticipated enrollment. Admission credentials must include: (1) an application for admission; (2) two official or certified true copies of all grade reports, diplomas, and academic records attesting to the completion of undergraduate work; (3) supplemental information form for international students which includes a financial summary stating amounts and sources of support for the duration of study; and (4) verification of English competency.

English competency is certified by achieve-

ment of a minimum of 550 on the Test of English as a Foreign Language (TOEFL). (A minimum score of 500 is required for admission into Music Performance, Studio Arts, Applied and Industrial Mathematics, and Computer Science.) Information about the TOEFL administration dates and registration procedure may be obtained from TOEFL, Educational Testing Service, Princeton, New Jersey 08540, USA. Towson University is a test site for the TOEFL. Towson University administers an institutional TOEFL in the fall and spring. Information can be obtained from the International Student Office 410-830-2421.

Admission

An applicant for admission to a degree program can meet admission requirements by holding (1) a master's degree or doctorate from a regionally accredited college or university, or (2) a bachelor's degree with a grade point average of 3.00 (on a 4-point scale) and by meeting all additional admission requirements of the program. The grade average requirements may be satisfied by a 3.00 average for the most recent 60 credits on the applicant's baccalaureate record. Courses taken beyond the baccalaureate degree may be included in the undergraduate grade point average if they are at least upper division undergraduate work. Courses used for admission credentials, including program prerequisites and courses used to raise the average GPA for admission, cannot be applied toward a master's degree. At the option of the program director, students in the second bachelor's degree program may be evaluated on the basis of the grade point average in that program if 30 or more credits have been completed.

Admission with conditions may be granted to applicants whose academic achievement does not meet the standards required for admission. See individual program description for specific requirements. Students admitted to a degree

program with conditions must satisfy requirements and correct any deficiencies as determined by the program director. Requirements that must be completed to continue in the program are listed on the admission work sheet and sent to the student with the letter of admission.

The minimum undergraduate grade point average for conditional admission may be waived for an applicant whose undergraduate degree was obtained at least ten years earlier, and who can document a minimum of five years of successful working experience in a field relevant to the applicant's program. The candidate's application to the Graduate School must be supported in writing by the program director. Candidates must meet all other entrance requirements of the program.

Non-Degree Students

Students who do not wish to pursue a degree are permitted to register for courses through the 600 level. Those who do not meet standards required for admission to a program may take courses, through the 600 level, as special non-degree students. Non-degree students who wish to take courses above the 600 level should request a transcript evaluation. Such students must meet the same grade point average requirements as fully admitted graduate students. Requests should be directed to the Associate Director for Graduate Admissions. A limit of 12 semester hours taken while in the non-degree status may be applied to a degree program with the approval of the program director.

Admission Prior to Receiving Baccalaureate Degree

Admission to some programs may be granted to seniors in their final semester. Undergraduate work through the first semester of the senior year is evaluated so transcripts submitted must include all grade through that semester. Admission stand-

ing is subject to cancellation or change if the admission credentials remain incomplete or do not meet the requirements for admission.

Graduate Work by Seniors at Towson University

Seniors at Towson University may register for a maximum of six credit hours of graduate study if they meet the following criteria: (1) the graduate courses must be in excess of the credits required for the bachelor's degree; (2) a written request to the Director of Graduate Education from the student specifying the graduate courses is submitted in advance of registration; (3) a 3.00 or higher cumulative average. Payment for the courses is separate from that of undergraduate courses taken in the same semester and is at the graduate tuition rate. The courses may be transferred later to the student's graduate record.

Enrollment Requirement after Application

Applicants for admission must indicate the date when they first plan to enroll. Records of students who do not enroll for courses in the stated semester will be held for one year. If enrollment in courses does not occur, or the student does not inform the Graduate School Office of another starting date, the applicant's records will be removed from the files and the student must apply again for future enrollment. One year is permitted to initiate courses work after admission to a degree program. If the applicant does not enroll in courses by that time the admission process must begin anew.

An applicant enrolled for courses is withdrawn from those courses if the transcript validating the baccalaureate degree is not received in the Graduate School Office by the required date; no refund is granted, and the student's application is removed from the Graduate files. A new application and fee must be submitted if the student wishes to take courses for graduate credit at a later time.

Registration and Fees

Registration

Information concerning registration may be obtained in the Graduate School Office. Students who have never applied for admission and are registering for the first time may take 500-600 level courses for graduate credit by completing the application for admission to Graduate School. Registration for 700- and 800-level courses is contingent upon the granting of full admission.

Fees

Tuition and other fees are subject to change without notice by action of the board of trustees.

Payment Of Fees

All checks or money orders should be made payable to Towson University for the exact amount of the charges. The student's social security number must appear on all checks submitted to the University. The University has no deferred payment plans. The *Discover*, *MasterCard* and *VISA* credit cards can be used for tuition, fees, room, dining point plan, and other charges. It is imperative that

students adhere to published payment deadlines. *If tuition, fees, and related charges are not paid by the established payment date, your class schedule will be voided and, if applicable, your residence hall space will be forfeited.* When a check given in payment of fees, fines or services is returned unpaid by the bank for any reason, a penalty fee of \$50 is charged. Failure to reimburse the University for an uncollectible check may result in your class schedule being voided.

Financial policy set by the Board of Regents and supported by the legislative auditors of the State of Maryland says that *all previous balances must be paid prior to registration for the following academic semester.* The University employs a "first in/first out" technique when applying payments to accounts. Therefore, payments are used to satisfy the oldest outstanding charge prior to applying any portion of a payment to current or more recent charges. Should the account of any student be sent to the Central Collection Unit of the State of Maryland because it is deemed delinquent, a 17 percent collection fee will be charged to the student. Students with outstanding balances should contact Financial Operations. Transcript requests will not be honored if a student has a financial obligation to the University.

Continuous Enrollment

Students are expected to register for courses on a regular basis. Should there be a lapse of two academic years during which courses are not taken for graduate credit, the student's records are removed from the Graduate Office files. If the student desires to take graduate courses after this action, he or she must initiate the application process as a new applicant. Students who wish to take graduate courses as non-degree students after this action must complete a new application but do not have to resubmit transcripts.

Students in a graduate program must request readmission, and will be notified of any required materials necessary for readmission.

Course Load

A student who registers for nine graduate semester hours is considered a full-time student. One who takes fewer hours is designated a part-time student. The maximum load for full-time students is 12 semester hours.

Auditing Courses

Students may audit courses that carry graduate credit with the written consent of the instructor. Any graduate student may audit a course through the 600 level. Courses at the 700 level may be audited only by students admitted to a degree program. Audited courses appear on the University record as "AU" and may not be used to repeat a course for which credit has already been earned. Audited courses may not count as part of the credit hour load or be applied toward the master's degree. The regular tuition rate applies to audited courses.

Candidates for Degrees at Other Institutions

Students who are candidates for a graduate degree at another college or university may take graduate courses at Towson University. At least two weeks before registration the student must present a letter from the graduate dean of the home institution indicating that he or she is in good standing and that credit earned at Towson University is acceptable towards his or her degree.

Course Numbers

Each department has one or more three or four letter codes preceding the three digit course classification number. The three digit course number indicates the following with respect to level:

- | | |
|---------|-----------------------------|
| 100-499 | undergraduate courses |
| 500-599 | upper-division courses |
| | offered for graduate credit |

600-699	graduate courses available to all post-baccalaureate students
700-799	graduate courses available only to fully-admitted graduate students
800-899	graduate research and thesis courses

Upper Division Courses for Graduate Credit

Courses taken for undergraduate credit may not be repeated at the 500 level for graduate credit. Students should be sure that any course taken at the 500 level does not appear on a previous transcript with the same title.

Scheduling of Courses

Most graduate courses are offered after 4:00 p.m.

Grading System

- A - 4 quality points
- B - 3 quality points
- C - 2 quality points
- F - 0 quality points

FX - assigned when the student registers for a course but does not attend, or fails to withdraw officially from the course by the published last date to drop the course.

I (incomplete) -assigned at the end of the semester because of illness or other reason beyond control of the student. Unless the course is completed by the last day of the next regular semester, the grade becomes "F." It is the responsibility of the student to make arrangements to complete course requirements for removal of the "I."

IP (in progress) -assigned for the thesis continuum. When the thesis is completed the "IP" grades are changed to "S" (satisfactory) or "U" (unsatisfactory).

W (withdrawn) -assigned when the student withdraws from the course according to policy.

Inter-Institutional Enrollment

Students admitted to graduate programs are eligible to take courses at other University System of Maryland schools. Credits earned at a host school will be placed on the student's Towson record with the grade earned. Tuition and fees for any such courses will be paid at Towson. Regulations governing this type of enrollment and the form for registration may be obtained in the Graduate School Office. The form must be signed by the Associate Dean after appropriate approval is obtained. Inter-institutional enrollment is not available for the summer sessions.

Repeating Courses

Courses for which a grade has been awarded may be repeated only once. The grade of "W" does not replace a previously awarded grade. When the course is repeated the student receives the credits for the course (counted once) and the higher of the two grades. Upon completion of the repeated course, a repeated course form must be submitted to the Registrar by the student. Grades for courses taken at other institutions may not be used to re-

place grades for courses completed at Towson. Courses taken for undergraduate credit may not be repeated for graduate degree credit.

Withdrawal from a Course

Students dropping within the change of schedule period will have no grade recorded. If the course is dropped after the change of schedule period, but within the period to drop with the grade of "W," the "W" grade will be recorded on the permanent record. Students who do not officially drop a course during the established time periods will receive the grade earned in the course (A,B,C,F) as determined by the instructor.

Students with documented medical problems or verified circumstances beyond their control may petition the Graduate Studies Committee, in care of the Associate Dean, Graduate School, to drop a course after the established deadline and receive a grade of "W." Documentation must accompany the petition. If approved, grades of "W" will be recorded for all unearned grades (FX). Earned grades (A,B,C,F) will not be changed.

Financial Aid

Students who wish to apply for a graduate assistantship or for other types of financial aid must be admitted to a degree program before an award can be made. New students should allow sufficient time for admission credentials to be assembled and for the graduate school application to be completely processed.

Assistantships

A limited number of graduate assistantships on and off campus are available to qualified students recommended by the appropriate department. The stipends vary according to length of the period of employment and the number of hours worked. The full stipend is \$4,800. In addition to the stipend the assistant receives a waiver of tuition for regular

courses. Waivers are prorated according to the terms of the assistantships. Graduate assistants are required to provide appropriate work each week during the semesters in which assistantships are in effect. Application forms for assistantships may be obtained from the Graduate School Office. Detailed information may be obtained by writing to the Director of Graduate Education, Graduate School.

Campus-Based Financial Aid Programs

Financial aid is available to graduate students admitted as degree candidates, making satisfactory academic progress, fulfilling the eligibility requirements of the program for which they apply, and registering for six or more

credits a semester.

The University receives a limited amount of money each year from the Federal Perkins Student Loan and Federal Work Study programs to assist students. The programs are "need based." To receive consideration, a student must file a Free Application for Federal Student Aid (FAFSA) or a renewal application. All application materials must be received in the Financial Aid office by March 15th for the following academic year for first consideration. Students may apply as early as January 1st. (This form should be mailed by January 30th to allow sufficient time for processing. More detailed information on financial aid programs and eligibility requirements is available upon request from the Financial Aid Office.

The Federal Perkins Loan Program

If the student is eligible and funds are available, a student may borrow from this program at 5% interest. No interest is due as long as the student registers at least half time. When a student drops out, drops below half time, or graduates, the grace period commences. Interest begins to accrue at the end of the grace period. See promissory note for length of grace period.

Federal Work Study Program (FWS)

If the student is eligible and funds are available, FWS allows a student to work on or off campus. All Federal Work Study jobs must be cleared through the Financial Aid Office. A FWS eligibility is the maximum amount that a student may earn. It is the responsibility of the student to find a FWS job and to monitor earnings so as to avoid exceeding FWS eligibility.

Federal Direct Student Loan Program

The eligibility requirements for a subsidized loan from this program are the same as for the campus-based programs. If you do not qualify for a subsidized federal direct student loan, you may borrow from this program and receive an unsubsidized loan.

With a subsidized Federal Direct Loan, no interest is charged and no repayment is required until six months after you cease to be enrolled on at least a half-time basis. If you borrow from this loan program and receive an unsubsidized loan, interest will accrue while you are in school, and during grace periods. The principal is not due until six months after you cease to be enrolled on at least a half-time basis.

For new borrowers the interest rate is variable based on the 91-day treasury bill rates for a 12-month period.

Your actual payment amount will depend upon the total amount you borrow. The more you borrow, the higher your monthly payments will be. Repayment schedules and options are available for the Financial Aid Office. You may repay the entire loan or any portion of it at any time without penalty.

Graduate students may borrow up to \$18,500 a year, up to a maximum of \$138,500 including any loans made at the undergraduate level.

A student may never borrow more than the cost of education less other aid received for the academic period. Graduate students must take a minimum of six (6) graduate level courses a semester to borrow at the graduate level. If you are taking less than six (6) graduate credits a semester you will borrow at the undergraduate level.

Degree Requirements

Eligibility For Graduation

Students must complete all program prerequisites, as well as all required and elective master's degree courses with a minimum average of 3.0 in all graduate work taken at Towson University as well as 3.0 in all courses included on the program of study. Students must also pass the master's degree written examination, and, if required by the particular program, additional oral and written examinations. All degree requirements including resolution of incomplete grades and the submission of the final copy of the thesis (which must be delivered to the Graduate School), if the thesis option is selected, must be completed by the last day of classes of the semester in which the student is applying for graduation. The application for graduation must be filed by the published date.

Thesis Procedure

Students intending to write a thesis should obtain the manual Guidelines for Preparing the Master's Degree Thesis from their program director or from the Graduate School Office.

Time Limitation For Completion Of Degree Requirements

All requirements for the master's degree must be completed within a seven-year period.

Upper-Division Courses

A maximum of nine semester hours of upper-division courses (500 level) may be earned toward a master's degree.

"C" Grades

A maximum of six semester hours of "C" grades are allowed for graduation.

Courses Taken As A Non-Degree Student

A limit or twelve semester hours may be used in a program if taken by non-degree students who later apply for degree status.

Special Format Courses

In all degree programs, a limit of 12 semester hours is placed on workshops, independent study, travel and study, directed reading, or other special format courses.

Transfer Credit

A maximum of six transfer credits may be allowed, but required courses in a program must be completed at Towson University.

Application For Graduation

The request for graduation review for a degree, music certificate, or the certificate of advanced studies in school psychology is submitted to the Graduate School Office. The deadline for submission of the application is published in the academic calendar on page 1 of this catalog and in the schedule booklet. If the application is submitted late, graduation is postponed until the next graduation date.

All graduation requirements including resolution of incomplete grades and acceptance of the completed thesis (if a thesis is undertaken) must be completed by the last day of the semester in which the student is applying for graduation.

If the student does not complete requirements for graduation, the application must be resubmitted during the semester in which graduation is intended.

Academic Policies

Towson University Policies

Privacy Rights Of Parents And Students

Towson University is in compliance with Section 513 (protection of the rights and privacy of parents and students) and Section 514 (protection of pupil rights) of Title V - Education Administration of the Education Amendments of 1974. University policies on this issue are spelled out in detail in Appendix B.

Non-Discrimination In Education And Employment

Towson University is in compliance with Titles VI and VII of the Civil Rights Act of 1964, the Equal Pay Act of 1963, Title IX of the Education Amendments of 1972. Titles VII and VIII of the Public Health Service Act, Section 504 of the Rehabilitation Act of 1973, Section 303 of the Age Discrimination Act of 1975, Executive Order 11246/I1375 and Article 64A (The Governor's Code of Fair Practices). In accordance with these laws, the University does not discriminate against any individual for reasons of race, color religion, national origin, sex, age, political affiliation, marital status, or condition of handicap in the admission of students, educational programs and activities, hiring of faculty or staff, or any terms and conditions of employment. The University is also in compliance with federal regulations regarding prohibition of discrimination on the basis of veteran status. Information on these laws and copies of the Affirmative Action Plan of Towson University are available from the Affirmative Action Officer.

Maintenance And Disposition Of Records

Students who do not register within one year of admission must submit new admission credentials and application data if they subsequently take courses.

All student records, including academic records from other institutions, are part of the

official file, and are retained subject to stated policies. They cannot be returned or duplicated for any purpose. Students should obtain their own copies of official credentials for advisory purposes and other personal uses.

Confidentiality Of Records

In keeping with the Family Educational Rights and Privacy Act of 1974, Towson University respects the confidential relationship between the University and its students by preserving, to the maximum extent possible, the privacy of all records relating to its students. Records are kept only on matters relevant to the academic admission process and to the student's progress toward a degree. The records will not be disclosed except upon student's written request or with his or her written consent, under legal compulsion, or in carefully circumscribed instances based on clearly-defined policies of Towson University (see appendix B).

Substance Abuse Policy

Each student is expected to read and abide by the policies and regulations of Towson University concerning drug and alcohol abuse. The Substance Abuse Policy is found in Appendix E.

Student Responsibility

It is the responsibility of the student to become knowledgeable of, and to observe, all University policies, regulations and procedures. In no case will a waiver of requirements or an exception be granted because a student pleads ignorance of policy or regulation or asserts that he/she was not informed of a specific requirement by an advisor or other University authority. The student should become especially familiar with: (1) the regulations in this catalog, (2) the section presenting

requirements for the degree sought, and (3) the offerings and requirements of the student's major department.

Policy for graduate study, as stated in this catalog, is in effect for all students admitted to a program for the 1997-1998 academic year, and is that under which the student operates through the term of his or her study toward completion of degree requirements (subject to the disclaimer in the next paragraph).

While the provisions of this catalog will ordinarily be applied as stated, the catalog and the information contained herein do not constitute a contract. Towson University reserves the right to change any provision listed in this catalog, including but not limited to academic requirements for graduation, without actual notice to individual students. Every effort will be made to keep students advised of any such changes. Information on changes will be available from advisors and in the dean's office. It is especially important to note that it is the individual student's responsibility to keep apprised of current graduation requirements for his/her particular degree program.

Graduate School Policies

Academic Integrity

Students are expected to maintain a high standard of academic integrity. Inappropriate classroom conduct, cheating and plagiarism may result in disciplinary action by the Graduate Studies Committee.

Instructors are responsible for maintaining the academic integrity of courses and will initially handle problems of classroom conduct, cheating and plagiarism in a discussion with the student. Unauthorized assistance in preparing materials submitted as original work by the student constitutes a violation of academic integrity and results in action being taken. The instructor may lower the student's grade or give

a failing grade for the course. If the instructor decides that further action is warranted, he or she will notify the student that a formal charge will be made to the Graduate Studies Committee. A written report of the incident will be filed with the committee.

The committee will review the facts of the case and make a decision regarding the status of the student. The committee will either absolve the student of the violation or impose a penalty. The penalty may be, but is not limited to, the following: (1) agreement that the lowered course grade is sufficient disciplinary action; (2) mandatory suspension from taking courses for graduate credit for a designated period of time; or (3) dismissal from Graduate School.

Academic Standing

Good academic standing in a degree program requires a minimum 3.0 grade point average for all courses taken for graduate credit whether or not they are required for the degree. Good academic standing is necessary to transfer course work, to take the master's degree examination and to graduate.

Should the degree student's average fall below a 3.0, a letter of academic warning will be sent. The grade-point average must be restored to 3.0 within nine semester hours, completed in a one-year period from the semester in which the GPA fell below 3.0. A student on academic probation who does not restore the GPA to 3.0 as required will be withdrawn from the degree program.

The 3.0 average may be restored by repeating courses or by taking additional courses. If courses beyond those required in the degree are taken to raise the GPA, a maximum of six semester hours approved by the graduate coordinator is allowed. All requirements for the program must be completed within the seven-year period permitted by Graduate policy.

Academic Standards, Appeals, Hearings And Grievances

Matters of graduate academic standards

are the responsibility of the Graduate Studies Committee. Appeals related to academic matters should be made to this committee by writing in care of the Dean, Graduate School.

Graduate School policy on procedures for appeals, hearings, and grievances is found in Appendix F of this catalog.

In all cases involving disciplinary action, or other charges, procedures of due process are followed. Additional information may be found under the headings of "Graduate Studies Committee" and "Academic Integrity."

Admission To A Second Program After Academic Dismissal

A student academically dismissed from a degree program is not eligible to reenter the same program, but may apply to another degree program. No additional admission requests will be accepted from a student academically dismissed from two programs. A student academically dismissed from a degree program because of a low cumulative average may not utilize courses toward a degree that were taken prior to and including the semester in which the average fell below a 3.0.

Advising

At the time of admission to a graduate program, the student is assigned a faculty advisor by the department responsible for the student's program of study. Registration for a newly-admitted student begins with a visit to the academic advisor, who will assist the student with information about specific courses and degree requirements, and the development of a program of study. The student should consult with the advisor before registration each semester.

Program of Study

Each degree student must follow a program which is approved by the student's advisor and the program director, and which conforms to Graduate School Policy. Courses taken prior to planning the program of study can be included only if approved by the gradu-

ate coordinator. The advisor's and the program director's approval is needed for any revisions. The program of study may include no more than nine credits at the 500 level.

Change From One Degree Program To A Different Program

Students may request a change of program at any time, but may not be enrolled in two master's degree programs concurrently. The request should be in writing to the Graduate School Office. The standing granted in the original program does not guarantee similar standing in the new program, which is entered subject to policies in effect at the time of the change.

Courses taken prior to the transfer may be utilized as part of the degree program if applicable. All courses, including those taken in the earlier program and used in the new program, are calculated in the GPA considered for graduation. The seven-year period permitted for completion of program requirements begins with the earliest course taken in the former program that is used in the new program.

It is possible to return to the first program if the return is requested in writing within 60 days of the original request to change programs. The student may return to the original program after the 60-day period subject to admission policies in effect at the time of the application to return.

Exceptions To Academic Policies, Regulations, Or Requirements

Exceptions to academic policies, regulations, or requirements as stated in this catalog or elsewhere are rarely made, and then only for truly extenuating circumstances. A student who believes an exception is justified may petition the Associate Dean, Graduate School. The request must state the specific exception being requested and the reasons for the request. For degree students, the program director must countersign the request, indicating his or her recommendation. In cases that involve faculty in addition to the program director, the coor-

dinator forwards the request to the appropriate faculty member(s) for additional written recommendation. The signed request is then forwarded by the program director to the Associate Dean, Graduate School. Non-degree students must petition the Associate Dean directly.

Reentry To A Degree Program After Lapse Of Time Limitation

For readmission to the same or another degree program after the seven-year period for completion of the degree has elapsed, the student's records are evaluated and admission is granted under current Graduate School policy. Previous course work will be reviewed by the program director. Up to twelve semester hours of courses taken while previously admitted may be applied to the degree if they are still part of the program's curriculum and are approved by the program director. Any courses not approved must be repeated or replaced with additional courses approved by the program director.

Transfer Credit

Courses taken prior to admission must have been taken at a regionally accredited college or university, must be applicable to a graduate degree at the offering institution, and cannot have been utilized as part of an earned

degree. Transfer courses must have been completed with a grade of "B" or higher (Pass/Fail or S/U grading is not acceptable), and within the span of seven years allowed for completion of the degree requirements. The seven year limitation cannot be extended for transfer credits. Courses such as workshops, independent study, travel and study, directed reading, and other special format courses are not acceptable for transfer credit. In-service courses, whether or not they are awarded graduate credit by a college or university are not acceptable for transfer credit.

Students request permission to take courses at another institution after admission to Towson University by submitting a written request to the Director of Graduate Education prior to taking the course. The course must be approved for the student's program and not be offered by Towson University during the period of the student's attendance. Written approval must be received by the student from the Director of Graduate Education before the student registers for the requested course(s). Transfer credits are not used in computing academic averages. The courses appear on the Towson University transcript with the titles and credits earned, but without grades earned.

ART, STUDIO

Degree: Master of Fine Arts
 Program Director: Stuart Stein
 410-830-2801

The Master of Fine Arts degree at Towson University is designed to meet the needs of those who wish to pursue the study of art, either for a career as an artist, or as a college level instructor. The program consists of professional study in either painting, photography, graphic design, illustration, sculpture, printmaking, ceramics, jewelry, fibers, or inter-related media. M.F.A. students are encouraged to attend full-time, but may attend part-time for part or all of their degree work. The M.F.A. student enrolled full-time also maintains a residency in the art department, working in an assigned studio space.

The Art Department fosters an M.F.A. program that draws from all aspects of a diverse and comprehensive curriculum. M.F.A. students study within a specific concentration while also being able to choose from a wide variety of learning experiences. The conceptual and ideological bases for artistic endeavors are explored through art history, graduate seminars, and weekly critiques. The goals of the M.F.A. program are to direct the M.F.A. student to explore, focus, and excel. Through conceptual and ideological dialogue, as well as the availability of technical expertise, the M.F.A. student at Towson is directed towards thematic consistency. While the Post-modern

environment encourages the integration of new technologies, interdisciplinary approaches and multicultural influences, the need to focus ideas within this climate is foremost in the mentoring of developing artists in the M.F.A. program.

Applicants to the M.F.A. program who are denied admission but display outstanding potential, may be invited to participate in post-baccalaureate studies in Studio Art as preadmission coursework for the M.F.A. program in Studio Art. Upon successful completion, these studies guarantee acceptance into the M.F.A. program in Studio Art.

Admission Requirements:

1. A baccalaureate degree, preferably in art.

HEALTH SCIENCE

Degree: Master of Science

Program Director: Susan Radius
410-830-2637

Towson University offers a three-concentration program with specializations in school health, community health education and administration. Upon completion of the degree program, the student will have acquired knowledge and understanding of the facts, theories and principles basic to the science of school health, community health, or administration in health services as well as in supporting behavioral, sociological and/or educational areas.

The student entering the school health concentration can consider such future employment possibilities as classroom health teacher, supervisor or director of the health science program within a school system, health education media specialist, program evaluation specialist within a school system, continuing education and school personnel department.

A graduate of the community health education concentration may pursue a career as a health education specialist in a variety of public and private sector agencies. Students holding current credentials in pharmacy, nursing, dentistry, dietetics and other professions may wish to combine their skills from prior training, and redirect their careers toward community education related to their specific prior training. Because the program provides professional training in public health and administrative skills, students may focus on such areas as program planning, evaluation, patient education, work-site health promotion, and others.

A graduate of the program with the administration concentration is prepared for positions

in public health that require sound backgrounds in both public health and administration.

APPLIED AND INDUSTRIAL MATHEMATICS

Degree: Master of Science

Program Director: Raouf Boules

410-830-3683

This program is intended to prepare individuals in areas of mathematics that deal with the problems typically encountered in business and industry. The program provides students with a broad knowledge in applied mathematics with an emphasis on areas with the highest demand in the high-technology sector. Examples of these areas are mathematical modeling, numerical methods and scientific computation, statistics, operations research and spectral analysis. Numerical, computational and algorithmic approaches to problem solving are stressed throughout the program. Graduates of this program will also be prepared for further work at the doctoral level.

A unique feature of the program is the requirement of a successful completion of a two-semester internship (6 credits total). This internship can be completed in cooperation with one of the department's established industrial partners or at the student's place of employment with appropriate department supervision. Another option for fulfilling the internship requirement is to play a leadership role in one of the projects investigated by the department's Applied Mathematics Laboratory. Typically, these projects are sponsored by business/industry corporations and government agencies. In all of the previously mentioned settings, the internship will involve working on real applied problems that are meaningful to business and industry. Students whose careers are in education may, with the approval of the department's Graduate Program Committee, replace the industrial setting of the internship with an educational setting. This will typically entail the development of original course material stressing applied mathematics and using innovative teaching techniques, for example, interactive texts.

The main objectives of the program are: (1) to prepare individuals who are capable of applying advanced mathematical skills to problems in areas of science, business, and industry; (2) to develop the students' ability to integrate, in a meaningful way, the use of technology in their everyday professional practice; (3) to give educators an opportunity to satisfy their in-service requirements and simultaneously enhance their knowledge of technology and enrich their mathematical backgrounds; (4) to supply students with the mathematical competency necessary for advancement to a more professional role in the high-technology sector; (5) to develop students' reasoning and communication skills for improved service to the high-technology sector; (6) to educate students to solve problems, to work in teams, and to communicate in an interdisciplinary setting; (7) to familiarize students with the recent advances in applied mathematics such as fractal geometry, chaotic dynamics, wavelets, spectral analysis, operations research and stochastic modeling; (8) to prepare students for further graduate work at the doctoral level in applied mathematics; and (9) to enrich the academic culture by providing opportunities for interaction of mathematical and industrial research.

Admission Requirements:

1. A baccalaureate degree in Mathematics or any other field. The applicant's undergraduate training must have included at least three semesters of calculus, a course in differential equations, and a course in linear algebra. Students with any deficiency in their mathematical background may be admitted conditionally if they are willing to remove such deficiency.
2. A undergraduate grade point average of 3.0 for full admission or 2.5 for conditional admission.
3. For international students whose native language is different from English, English competency must be certified by the achievement of a minimum of 500 on the Test of English as a Foreign Language (TOEFL).

Degree Requirements:

The student is required to successfully complete a total of ten courses (a minimum of 30 semester hours) as indicated below. A student may transfer up to two graduate-level mathematics courses taken at another institution provided that the transfer is consistent with the Graduate School policy. Students are required to submit a written technical report and to give an oral presentation based on their internship, to the Graduate Program Committee. Satisfactory completion of this summary of the internship experience is one of the requirements for graduation.

PSYCHOLOGY

Degree: Master of Arts

Vice-Chair, Graduate Programs in Psychology:
 Anthony C. DiCesare, Ph.D.

The program offers the student the opportunity of in-depth specialization in one of four psychological areas. The areas are clinical psychology, counseling psychology, experimental psychology and school psychology. Each is described below in detail with reference to objectives and requirements. All program prerequisite courses are undergraduate.

The psychology department faculty recognizes a special responsibility to the profession of psychology to ensure that all graduates of our program demonstrate attitudes and behavior consistent with the standards of the profession. The faculty of the concentration involved may recommend to the program director disciplinary action for such behavior as dishonesty, unethical conduct, deficient professional/clinical skills, or other behaviors construed by the faculty as counterproductive to the field of psychology. Recommendation for disciplinary action will be made by a faculty committee consisting of the program director and the graduate faculty teaching within that concentration. Before disciplinary action is carried out, the decision for such disciplinary action will be reviewed by the Professional Standards Committee of the psychology department.

CLINICAL PSYCHOLOGY

Program Director: Barry A. Bass, Ph.D.

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY

Degree: Master of Science
 Program Director: Julie E. Ries
 410-830-3105

The speech-language pathology and audiology program is accredited by the Educational Standards Board (ESB) of the American Speech-Language-Hearing Association and the Maryland State Department of Education. The program provides the student with (1) study of normal communication processes; (2) an in-depth investigation of communication disor-

ders; (3) development of therapeutic goals, procedures, and materials; and (4) extensive clinical experience in on- and off-campus settings. The program is designed to enable pre-professionals in the field, i.e., those with a bachelor's degree or the equivalent in speech-language pathology and audiology, to meet the academic and clinical practicum requirements of national and state accrediting, certifying, and licensing bodies.

Students elect to specialize in either speech-language pathology or audiology. Applicants indicate their area of emphasis on the application form.

The degree will prepare the individual for national/state certification and state licensure for employment in public school, clinical or hospital settings, or private practice and to pursue advanced degrees. All clinical practicum clock hour requirements of the American Speech-Language-Hearing Association (ASHA) and the Department of Communication Sciences and Disorders must be completed before the M.S. degree is awarded.

The Communication Sciences & Disorders Department faculty recognizes a special responsibility to the profession to ensure that graduates of master's degree programs demonstrate attitudes and behaviors consistent with the standards of the profession. In keeping with this responsibility, faculty members may recommend to the program director that a student should be disciplined (including dismissal) for exhibiting behavior deemed to be inconsistent with the standards of the profession. Non-professional behaviors include dishonesty, unethical conduct, deficient professional/clinical skills, or other behaviors construed by the faculty as counter-productive to the field. Recommendations for disciplinary action will be made by a faculty committee consisting of the program director and the appropriate graduate faculty. The recommendation for disciplinary action will be reviewed and acted upon by the faculty of the department and forwarded to the dean of the College of Graduate and Extended Education. The student has the right to due process.

Admission Requirements:

THEATRE

Degree: Master of Fine Arts

Program Directors: Juanita Rockwell, Ralph Blasting
(410)830-3851

The M.F.A. program in Theatre at Towson University is an experimental, self-directed process designed to challenge, expand and develop the participant's artistic vision. This vision is explored in terms of its structural, aesthetic and cultural context, as well as its skillful application of craft. Intercultural, interdisciplinary and collaborative, our program aims to reconstruct a theatre capable of transforming the artistic, social and economic constraints of the American artistic landscape.

We seek individuals who wish to encompass the widest possible understanding of theatre as an art form: those who would feel restricted by a conservatory style program. Whether directing, designing, performing, producing, constructing, or writing, the student-artist must be willing to work both independently and collaboratively. The program is based upon the cross-fertilization of ideas among participants and the thoughtful implementation of human, material, economic, and environmental resources. To facilitate this process, student-artists will be expected to participate in creating their own opportunities, work in a variety of theatrical disciplines, and act as artist-producers for their projects.

Seminars and workshops with distinguished visiting artists form the foundation of the curriculum. These seminars expose the student-artist to a wide range of theatrical styles and methods, emphasizing their cultural context and underlying principles. In a culture dominated by television and the film industry, our training specializes in non-naturalistic theatre forms in order to challenge and strengthen the student-artist's personal aesthetic.

All graduate students approach projects from an interdisciplinary perspective. New work may be created in a variety of forms, such as interdisciplinary constructions or installations, ensemble creation, performance art, movement-theatre, or productions of new scripts. Transformations of existing literature may involve reconstructing classic text or de-

sign elements, historical reinterpretation, or the integration of intercultural aesthetics. In directing and design, special attention is given to the collaborative creation of style. In playwriting, special attention is given to innovative language and structure. In dramaturgy, special attention is given to aesthetic and cultural context. In technical production, special attention is given to integrating safely new technology, practices and materials. In performance, special attention is given to the integration of voice and movement as an expression of style. The student-artist is urged to combine disciplines within a given project, perhaps working as designer/director, technician/designer, or writer/performer.

The program is committed to training the artist as producer. Each student must be prepared to take responsibility for the overall task of bringing the work into being. To that end, we seek to build a nurturing environment where the combined energies of faculty, visiting artists and fellow students assist in the creation of work. In support of the idea that the developing independent artist will be identifying and serving audiences in the community, graduate students are encouraged to seek off-campus performance spaces.

The M.F.A. program seeks talented and innovative theatre artists who are committed to questioning old assumptions, exploring new possibilities, refining existing talents and articulating a vision to an audience. Student-artists must be committed, disciplined and capable of thriving in a self-directed environment. In a rapidly changing world culture, the artist must develop new ways of seeing, new skills, and new ways of working. The M.F.A. in Theatre at Towson offers a laboratory in which to explore new responses to a new world.

Admission Requirements:

Applicants must hold a bachelor's degree from a regionally accredited college or university with a grade point average of 3.0 or higher based on the applicant's overall undergraduate work or on the last 60 hours. Candidates with a minimum GPA of 2.5 may be eligible for admission at the discretion of the M.F.A. Program Directors and the Graduate School.

All matriculated students are accepted conditionally for one year. At the end of the first year of study, there will be a review process in which a student is either fully accepted, accepted conditionally for another year, or denied continuance.

Candidates are screened by both the M.F.A. Program and by the Graduate School.

The following should be submitted directly to the Graduate School no later than March 1:

- 1) A Graduate School application with required fee.
- 2) A current professional resume.
- 3) Three letters of recommendation from individuals who can speak to the applicant's talent, scholarship, collaborative skills, and ability to thrive in a self-directed program.
- 4) A list of at least three other references, with telephone numbers, which the department may contact for additional evaluations.
- 5) Official transcripts from every college or university attended.

The following are required as part of the department screening process and should be sent to the M.F.A. Program Directors directly, no later than March 1:

- 1) A Personal Artistic Statement outlining the candidate's goals as a theatre artist and the relevance of the M.F.A. program at Towson to the candidates objectives.
- 2) A current professional resume.
- 3) Slides, photographs, video, reviews, papers or other supporting materials.

An interview with an audition and/or preliminary portfolio review will be granted at the discretion of M.F.A. Faculty following initial admission screening. A list of suggested materials can be obtained from the program directors.

Appendix B

THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT

The Family Educational Rights and Privacy Act of 1974 is a Federal Law which provides that the institution must maintain the confidentiality of student education records. This law states (a) that a written institutional policy must be established and (b) that a statement of adopted procedures covering the privacy rights of students be made available. The University has taken the appropriate steps to comply with this law.

Towson University accords all the right under the law to students who have reached the age of majority. Information may be released to parents who have established the students' dependency as defined by the Internal Revenue Code of 1954, Section 152. The Judicial Affairs office will review the parent's claim of dependency and notify the student of the claim prior to release of any academic information. Except as permitted under the act, no one outside the institution shall have access to any information from the students' education records without the written consent of students. Those people permitted access under the Act include personnel within the institution, officials of other institutions in which students seek to enroll,

persons or organizations providing financial aid, accrediting agencies, persons in compliance with a judicial order and persons in an emergency acting in order to protect the health or safety of others.

Within the Towson University community, only those individuals acting in the students' educational interest are allowed access to student education records. This includes personnel in the offices of the Registrar, Comptroller, Financial Aid, and other academic personnel within the limitations of their need to know. The Registrar may grant access to educational records for other legitimate reasons permitted under the Act.

The University may provide Directory Information in accordance with the provisions of the Act without the written consent of the student. Directory information includes: student name, address, telephone number, date and place of birth, major field of study, dates of attendance, degrees and awards received, the most recent previous educational institution attended by the student, participation in officially recognized activities and sports, and the weight and height of members of athletic teams. The Registrar's

Office will release Directory Information at its discretion and may release Directory Information over the telephone or in writing. Students may withhold Directory Information by notifying the registrar in writing within two weeks after the first day of class.

A request for non-disclosure will be honored for only one academic year; therefore, authorization to withhold Directory Information must be filed annually with the Registrar.

The law provides students with the right to inspect and review information contained in their education records. The Registrar at Towson University has been designated to coordinate the inspection and review of student education records. These records include admissions, personal, academic and financial files. Students wishing to review their education records must make written requests to the Registrar. Records covered by the Act will be made available within thirty day of the request. Students may have copies made of their records with certain exceptions (e.g., a copy of the original or source document which exists elsewhere) or when the student has an outstanding financial obligation to the University. These copies would be made at the students' expense. Education records do not necessarily include records of instructional, administrative, and educational personnel which are the sole possession of the maker. Health records will not be released to the students, but may be reviewed by physicians of the students' choosing.

As stated in the Act, students may not inspect and review the following: financial information submitted by their parents, confidential letters and recommendations associated with admissions, employment or job placement or honors to which they have waived their rights of inspection and review. Educational records containing information about more than one student are restricted and the institution will permit access only to that part of the record which pertains to the student. The institution will not permit students to inspect and review confidential letters and recommendations placed in their files prior to January 1, 1975.

The University has established an appeal mechanism in accordance with the Act. Students who believe that their education records

contain information that is inaccurate or misleading, or unlawful may discuss their problems informally with the Registrar. The Registrar may agree to the request and the appropriate records will be amended. If not, the students will be notified that the records will not be amended; and they will be informed by the registrar of their right to a formal hearing. Requests for formal hearings must be made in writing to the Vice President for Academic Affairs. The Vice President will inform students of the date, place, and time of the hearing. Students may present evidence and may be assisted or represented at the hearings by counsel. The hearing panels which will adjudicate such challenges will be comprised of the Vice President for Academic Affairs, the Vice President for Student Affairs, the Graduate Dean, and the Academic Dean of the student's college. Decisions of the hearing panels will be final. The finding will be based solely on the evidence presented at the hearing, and will consist of written statements summarizing the evidence and stating the reasons for the decisions, and will be delivered to all parties concerned. The education records will be corrected or amended in accordance with the decisions of the hearing panels. Students dissatisfied with the outcome of their hearing may prepare a written statement which will be placed in the education records and maintained as part of the students' records.

Those students who believe that the adjudications of the challenges were unfair, or not in keeping with the provisions of the act may request that the hearing be reviewed by the President of the University. In addition, students who believe that their rights have been abridged, may file complaints, with The Family Educational Rights and Privacy Act Office (FERPA), Department of Health, Education and Welfare, Washington, D.C. 20201, concerning the alleged failures of Towson University to comply with the Act. Revisions and clarifications will be published as experience with the law and institution's policy warrants.

Appendix C

I. RESIDENCY

It is the policy of the Board of Regents of the University System of Maryland to recognize the categories of in-state and out-of-state students for purposes of admission, tuition, and charge differentials at those institutions where such differentiation has been established. The student is responsible for providing the information necessary to establish eligibility for in-state status.

- A. Students who are financially independent or financially dependent, as hereinafter defined, shall have their residency classification determined on the basis of permanent residency. For purposes of this policy, a permanent residence is a person's permanent place of abode as determined by the following criteria. Such students will be assigned in-state status for admission, tuition, and charge differential purposes only if the student (if financially independent) or the student's parent, guardian, or spouse (in the case of a financially dependent student):
 - 1. Owns or rents and occupies living quarters in Maryland. There must exist a genuine deed or lease in the individual's name reflecting payments/rents and terms typical of those in the community at the time executed. Persons not having such a lease may submit an affidavit reflecting payments/rents and terms as well as the name and address of the person to whom payments are made which may be considered as meeting this condition. As an alternative to ownership or rental of living quarters in Maryland, a student may share living quarters in Maryland which are owned or rented and occupied by a parent, legal guardian, or spouse;
 - 2. Maintains within Maryland substantially all personal property;
 - 3. Pays Maryland income tax on all earned taxable income including all taxable income earned outside of the State;
 - 4. Registers all owned motor vehicles in Maryland in accordance with Maryland law;
 - 5. Possesses a valid Maryland driver's license, if licensed, in accordance with Maryland law;
 - 6. Is registered in Maryland, if registered to vote;
 - 7. Receives no public assistance from a state other than the State of Maryland or from a city, county, or municipal agency other than one in Maryland, and;
 - 8. Has a legal ability under federal and Maryland law to reside permanently without interruption in Maryland.
- B. In addition to meeting all of the criteria set forth in the preceding section, to qualify for in-state status on the basis of permanent residence, a student or, if the student is financially dependent, the parent, legal guardian, or spouse, must have resided in Maryland for at least twelve (12) consecutive months immediately prior to and including the last date available for late registration for the forthcoming semester or session and must have continuously resided in Maryland during that period.
- C. If a student is financially dependent as hereinafter defined, the permanent residence of the parent, guardian, or spouse on whom he/she is dependent shall determine in-state status. If a student is financially independent, the permanent residence of the student shall determine in-state status.
- D. In-state status based on permanent residence is lost at any time a financially independent student establishes a permanent residence outside the State of Maryland. If the parent, guardian, or spouse through whom a financially dependent student has attained in-state status establishes permanent residence outside the State of Maryland, the in-state status is lost, in each instance, the student will then be assessed out-of-state tuition and charge beginning the next semester or session.
- E. In addition, the following categories of students shall have in-state status:
 - 1. A full-time or part-time (at least 50 percent time) permanent employee of the University System of Maryland;

2. The spouse or dependent child of a full-time or part-time (at least 50 percent time) permanent employee of the University System of Maryland;
 3. A full-time active member of the Armed Forces of the United States whose home of residency is Maryland or one who resides or is stationed in Maryland, or the spouse of a financially dependent child of such a person; and
 4. A graduate assistant.
- F. Students not entitled to in-state status under the preceding paragraphs shall be assigned out-of-state status for admission, tuition, and charge-differential purposes.

II. PROCEDURES

- A. The date on which conditions for in-state classification must be met is the last published date to register for the forthcoming semester or session. In those instances where an entering class size is established and where an application deadline is stated, institutions may require that conditions for in-state classification must be satisfied as the announced closing application date.
- B. A change in status must be requested in writing by a student prior to the last published date of registration in order to be effective for that semester or session. A student applying for a change to in-state status must furnish appropriate documentation as required by the institution.
- C. The student shall notify the institution in writing within fifteen (15) days of any change of circumstances which may alter in-state status.
- D. In the event incomplete, false, or misleading information is presented, the institution may, at its discretion, revoke an assignment of in-state status in addition to other disciplinary actions provided for by the institution's policy.
- E. Each institution of the University System of Maryland shall develop and publish additional procedures to implement this policy. Procedures shall provide that on request the President or designee has the authority to waive any residency requirement as set forth in 1A and 1B, if it is determined that the

student is indeed a permanent resident and application of the criteria creates an unjust result. Such procedures must provide for appeal to the President or designee of any residency determination using a system wide petition form. These procedures shall be filed with the office of the Chancellor.

III. DEFINITIONS

- A. **Financially Dependent:** For purposes of this policy, a financially dependent student is one who is claimed as a dependent for tax purposes, or who receives more than one-half of his or her support from a parent, legal guardian, or spouse during the twelve (12) month period immediately prior to the last published date for registration for the semester or session. If a student receives more than one-half of his or her support in the aggregate from a parent and/or legal guardian and/or spouse, the student shall be considered financially dependent on the person providing the greater amount of support.
- B. **Financially Independent:** A financially independent student is one who (1) declares himself or herself to be financially independent as defined herein; (2) does not appear as a dependent on the Federal or State income tax return of any other person; (3) receives less than one-half of his or her support from any other person or persons; and (4) demonstrates that he or she provides through self-support one-half or more of his or her total expenses.
- C. **Parent:** A parent may be a natural parent, or, if established by a court order recognized under the law of the State of Maryland, and adoptive parent.
- D. **Guardian:** A guardian is a person so appointed by a court order recognized under the law of the State of Maryland.
- E. **Spouse:** a spouse is a partner in a legally contracted marriage.
- F. **Support:** (1) Except as set forth in (2) below, support shall mean financial or material support, including gifts, services, and trusts, including income or benefits derived from one's family. (3) Support shall not include grants, stipends, awards, and benefits (including Federal and State student aid, grants, and loans) received for the purpose of education or by virtue of an

individual's status or prospective status as a student. Such resource shall not be considered in

calculating a student's financial dependence or independence.

TOWSON UNIVERSITY SUBSTANCE ABUSE POLICY FOR FACULTY STAFF AND STUDENTS

University System of Maryland Policy

The University System of Maryland, as an employer, strives to maintain a workplace free from the illegal use, possession, or distribution of controlled substances (as defined pursuant to Controlled Substance Act, 21 U.S.C. Sections 801, et. Seq.) Unlawful manufacture, distribution, dispensations, possession or use of controlled substances by University employees in the workplace is prohibited under University policy.

In addition to any legal penalties under federal and state law, employees found to be in violation of this policy or the Maryland Governor's Executive Order on Substance Abuse, 01.01.1991.16, may be subject to corrective action under applicable University personnel policies.

The University supports programs aimed at the prevention of substance abuse by University employees. Employees are encouraged to seek assistance for substance-dependency problems. Employee-assistance counseling and leaves of absence to attend rehabilitation programs are appropriate means for dealing with these problems.

Towson University Policy¹

The use of controlled substances and the abuse of alcohol presents a serious threat to individual health and everyone's safety. Moreover the use of illegal drugs and the abuse of alcohol can result in less than complete reliability, stability, and good judgment which is inconsistent with the standards set for the faculty, staff, and students of this University.

Towson University, as an employer, strives to maintain a workplace free from the illegal use, distribution, or possession of controlled substance. Any person found to be participating in such activity will be subject to administrative disciplinary action, mandatory counseling and treatment and/or criminal proceedings.

The use, possession, and/or sale of illegal drugs, are considered violations of Towson University's Student Code of Conduct, the faculty contract, and the terms of employment of administrative, classified, and contractual staff. Faculty, students, and employees who use, possess, or sell illegal drugs shall be subject to discipline, including mandatory counseling, suspension, or dismissal from the University. The University will take disciplinary action based on reasonable available information; such action will be independent of any civil or criminal processes precipitated by the same incident and will follow the policies and procedures of the University and the University System of Maryland Board of Regents.

In the workplace, use, possession, and/or sale of illegal drugs and controlled substances are also violations of state and federal laws for which individuals are subject to University disciplinary processes and/or arrest and criminal prosecution.

These serious workplace situations must be handled in ways which ensure the protection of the civil rights and handicapped rights of the accused, the treatment and rehabilitation of employees, and the notification of the necessary administrative and legal authorities.

Specific procedures for reporting drug use, penalties and appeals are part of a student handbook. Employee disciplinary measures and appeals for violations of this policy as well as other policies of the University are part of the Faculty Handbook, the Part-Time Faculty Handbook, and the Personnel Manual.

In addition to the University policy on substance abuse, all employees of the University including student employees are subject to the Maryland Governor's Executive Order 01.01.1991.16 on the Drug- and Alcohol-Free Workplace.

In accordance with federal legislation, Towson University's substance abuse policy will be distributed annually to all students² and employees through campus or U.S. Mail.

Furthermore, the student-athlete is additionally subject to the Towson University Department of Athletics Substance Abuse Policy. A

copy of this policy can be obtained from the Athletics Department office.

HEALTH RISKS OF SUBSTANCE ABUSE

Substance abuse is now recognized as the number one public health problem in the United States. Approximately 30% of all admissions to general hospitals and 50% to psychiatric hospitals have detectable substance abuse. Substance abuse accounts for approximately 150,000 deaths annually. This includes deaths from stroke, diseases of the heart and liver, and all alcohol and drug related suicides, homicides and accidents. Early detection can minimize or prevent the devastating consequences of substance abuse.

PENALTIES FOR SUSPECTED DRUG USE, POSSESSION OR SALE ON THE TOWSON UNIVERSITY CAMPUS

- A. The use, possession or sale of illegal drugs are violations of state and federal laws for which offenders are subject to arrest and criminal prosecution as well as University administrative processes. These serious offenses must be handled in ways to ensure the guarding of any evidence, the protection of the civil rights of the accused, and the notification of the proper authorities. To this end, specific procedures are outlined to be followed in any campus situation where substances are suspected to be illegal drugs.
- B. Any individual directly associated with the University System of Maryland who uses or becomes involved with illegal drugs without proper medical supervision shall be subject to such discipline, including suspension or dismissal from the state university and college system, as may be appropriate.
- C. Students, faculty and staff, in their routine activities, may observe suspected drug activities. As a result, some staff members become involved in the determination of any disciplinary action that follows suspected use, possession or distribution of an illegal substance. Specific actions or responsibilities in regard to the suspicion of illegal substances are listed in the following passage.

D. The University reserves the right to conduct drug testing consistent with applicable federal and state laws.

LOCAL, STATE, AND FEDERAL LAW DESCRIPTIONS RELATING TO POSSESSION AND DISTRIBUTION

Students and employees at Towson are subject to federal, state, and local laws for the possession and distribution, of illegal drugs.

Federal law³ states that it is unlawful to possess any controlled substance, including marijuana, cocaine, and heroin, for any illegal purpose. If the substance is cocaine, or contains a cocaine base, the penalty for simple possession is a fine and/or imprisonment from 5 to 20 years. For other illegal drugs, the penalty for simple possession is a fine of at least \$1000 and/or imprisonment for up to 3 years. The penalties increase if the possession includes intent to manufacture, distribute, or dispense a controlled substance, especially if done so near a public or private elementary, vocational, or secondary school, or a public or private college or university. Additionally, any person who violates this law shall also be liable to the U.S. for an amount up to \$10,000 in civil penalties.

In addition to the federal laws, the State of Maryland has its own laws dealing with distribution, manufacturing, and possession of controlled substance. For instance, any person who unlawfully manufactures or distributes any controlled dangerous substances may be fined up to \$25,000 and may be imprisoned for up to 20 years for a first offense.⁴

Students and employees at Towson are subject to state and local laws for drinking and obtaining alcohol.

It is illegal in the State of Maryland for any person under 21 to drink alcohol.⁵ It is also illegal for a person under 21 to falsify or misrepresent his or her age to obtain alcohol, or to possess alcoholic beverages with the intent to consume them.⁶ It is also illegal in most situations to furnish alcohol to a person under 21, or to obtain alcohol on behalf of a person under 21. The penalty is a fine up to \$500 for a first offense, and up to \$1000 for repeat offenses.

In addition, state law⁷ dictates that it is illegal in Baltimore County to possess alcohol in an

open container in any parking lot of any shopping center or retail store, unless given permission by the owner. The penalty is a fine up to \$100.

It is also illegal in Baltimore County to consume alcohol on any public property or highway, with penalties including a fine of up to \$100 and/or imprisonment of up to 30 days.

Students and employees of Towson University are also subject to state and local laws governing drinking and driving.⁸ It is unlawful to drink and then drive.⁹ A Blood Alcohol Level of .07 or 1.0 will result in fines, imprisonment or both. Individuals under 21 with a B.A.L. of only .02 (approximately 1 drink) will be charged with a violation of restricted license which will result in a suspended license until the age of 21.¹⁰

Any individual with a B.A.L. of .07 or more will be charged with a violation of Driving While Under the Influence.¹¹ A B.A.L. of .10 or more will result in a violation of Driving While Intoxicated.¹²

It is also unlawful to drive while under the influence of any Controlled Dangerous substances whether or not they are licit or illicit (prescribed or unlawfully obtained).¹³ Persons can still be charged with these violations even though they possess a driver's license from another state.¹⁴

1 Towson University policy on substance abuse includes provisions for the Maryland Governor's Executive Order 01.01.1991.16 on the Drug- and Alcohol-Free Workplace, the policies of the University of Maryland

Board of Regents, The Maryland Commission on Higher Education, the Code of Maryland Annotated Regulations, the Federal Drug-Free Workplace (34 CFR Part 85) and the Federal Drug-Free Schools and Campuses (34 CFR Part 86).

GRADUATE STUDENT PROCEDURES FOR APPEALS, HEARINGS, AND GRIEVANCES

STUDENTS RIGHTS AND RESPONSIBILITIES

Rights: The student is entitled to privacy, expression, non-discrimination, non-harassment, and appeal.

Responsibilities: The student is responsible

for: (1) being knowledgeable of, and observing, all University and Graduate School policies, regulations, procedures, and academic requirements, including specific requirements of the program; and (2) participating in the maintenance of a high standard of academic integrity.

Appeals and grievances are initiated by the student. Hearings are initiated by the University.

APPEALS

Exceptions to Policies: A student may petition for an exception to academic and admissions policies and procedures on either procedural or substantive grounds. The petition must be made to the Dean of the Graduate School. If not satisfied with the Dean's decision, the student may submit a written appeal to the Graduate Studies Committee, c/o the Graduate school. Appeal of a Graduate Studies Committee decision is made in writing to the Provost of the University.

Appeals of academic and admissions policies other than those that follow must adhere to the appeals procedure stated above.

Dismissal From Programs: The Dean of the Graduate School may dismiss a student for cause from a program based on academic or other Graduate School policies or on the recommendation of a department. A student who is dismissed will be notified in writing of the dismissal. The student's written appeal must be received in the Graduate School within 15 working days of the date of the notification of dismissal.

Grades: A student appealing a course grade must make all reasonable effort to resolve the matter informally in the following sequence: (1) he or she must meet with the instructor; (2) if not satisfied, the student meets with the department chairperson; (3) if still not satisfied, the student meets with the Dean of the college or school. If the problem is not resolved to the student's satisfaction, he or she may appeal in writing to the Graduate Studies Committee. The appeal will be received only after the above steps have been taken, and must be received by the Graduate Studies Committee no later than the end of the semester following the one in which the grade was received.

The Graduate Studies Committee reviews the appeal, and will send it to the Adjudication Committee only if there is sufficient evidence that a grade has not been determined in accordance with the terms set forth by the instructor.

Academic Integrity: Instructors are responsible for maintaining the academic integrity of courses and will initially handle problems of classroom conduct, including but not limited to cheating and plagiarism. The instructor

may lower the student's grade or give a failing grade for the course. A student appealing an instructor's decision must make all reasonable effort to resolve the matter informally in the following sequence: (1) he or she must meet with the instructor; (2) if not satisfied, the student meets with the department chairperson; (3) if the problem is not resolved to the student's satisfaction, he or she may appeal in writing to the Graduate Studies Committee. The appeal will be received only after the above steps have been taken, and must be received by the Graduate Studies Committee no later than the end of the semester following the one in which the grade was received.

HEARINGS

Students are expected to maintain a high standard of academic integrity. If a violation of academic integrity occurs in a classroom and if the instructor decides that further action beyond that taken within the course is warranted, he or she will notify the student that a formal charge will be made to the Graduate School Committee. A written report of the incident will be filed with the committee.

In cases of violation of Graduate School policies, efforts will be made by the Graduate School administration to clarify and to allow the student the opportunity to address and resolve the issue before any charges are made in writing to the Graduate Studies Committee.

A hearing before the Graduate Studies Committee is held whenever charges are made against a student by the Graduate School for infraction of Graduate School Policy which includes, but is not limited to, academic integrity, falsification of documents, or other acts of misrepresentation. Disciplinary action by the committee may include dismissal from the Graduate School.

Hearing Procedures:

1. The proceedings are recorded.
2. The Chair of the Graduate Studies Committee explains the purpose of the hearing.
3. The Chair reads the charges. The student is present for the hearing. If the student does not appear, this will be stated for the record and construed as a plea of guilty.

4. The student may be accompanied by a friendly observer. This party may not be or act as legal counsel, except when concurrent criminal charges have been filed. Then counsel may advise the accused party but may not otherwise participate in the hearing.
5. Evidence, either in writing or by testimony of witness, is presented. Witnesses may be questioned by the committee and the student.
6. The student is afforded an opportunity to present his or her side of the story and to call witnesses. Character witnesses will not be heard. Witnesses for the student may be questioned by the committee and then be excused.
7. The committee members may ask questions of the student, the instructor, and the Graduate Coordinator.
8. The student may ask questions and make a closing statement.
9. The student and other non-committee members are excused.
10. The committee deliberates in executive session and renders a decision. These deliberations are not recorded.
11. The student is notified of the decision by letter within 15 days of the hearing. When appropriate, the notification includes instructions on further appeals.
12. The recording will be kept on file in the Graduate School for one year.

GRIEVANCES

Redress of Grievance: Grievances based on the following grounds are made to the Judicial Affairs Officer, who will instruct the student on submitting a written grievance:

1. A flaw in the student's right of due process
2. Evident bias in the decision of the hearing body
3. Inconsistent or overly severe sanction imposed
4. New evidence of insufficient consideration of all aspects of the situation.

Discrimination and Harassment: The University complies with all state and federal civil rights legislation. The University's policy is to prohibit discrimination against any individual for reason of race, color, religion, national origin, political affiliation, marital status, sexual orientation, disability, veteran status, or other non-merit factor.

If a student alleges discrimination and/or harassment, he or she shall make all reasonable effort to resolve the issue(s) with and in the following order: (1) the instructor, (2) the department chair, and (3) the Dean of the college or school within 30 days of the alleged incident. The student should confer with the Fair Practices Officer if issues are not satisfactorily resolved. A student making a formal complaint of discrimination and/or harassment must submit a written statement to the Office of Fair Practices within 180 days of the date of the alleged incident.
